1. Release Features

Overview

The following new features have been added in this release.

- *Added the ability to upload operating system version changes to improve HealthLink's quality assurance.*
- *Removed old Ministry of Health CA certificates and an expired Medicare CA.*
- *Added support for Aduro 1.1 and 1.0.*
- *Added the ability to submit HealthLink Forms on Mac OSX.*
- *Added a new HealthLink CA to replace the current one which will expire in December 2014.*
- *Added the ability to run the HealthLink Messaging Service (HMS) on Mac OSX as a service.*
- *Added an icon to the notification area on Mac OSX to control the HMS service.*
- *Modified new installations on Mac OSX so they install and start the HMS service automatically.*
- *Added the ability to install/uninstall and start/stop the HMS service from the Advanced Options tool on Mac OSX.*
- *Added the ability to run the Quantum service on Mac OSX.*
- *Modified new installations on Mac OSX so they install and start the Quantum service automatically.*
- *Added the ability to install/uninstall and start/stop the Quantum service from the Quantum Administrator tool on Mac OSX.*
- *Added the ability to start/stop Quantum directly from the Quantum Administrator tool on Mac OSX without requiring the service to be started.*
- *Added support for the Quantum Submission Gateway on Mac OSX.*
- *Added support for a new operating system version: Mac OSX 10.9.*
- *Modified the position of the Run Now and Close/Cancel buttons in the HealthLink Client.*
- *Removed the Close button from the HealthLink Client.*
- *Removed the Minimise button from the HealthLink Client.*
- *Improved the consistency of the install/uninstall and start/stop sections in the Advanced Options tool and the Quantum Administrator tool.*

2. Resolved Issues

Overview

The following outstanding issues have been addressed in this release.

- *Fixed the HealthLink Client so it no longer sends duplicate messages when an EMR has locked an outgoing message file.*
- *Removed an error message that appeared during a new installation on Mac OSX 10.6.*
- *Fixed a spelling mistake in the Advanced Options tool.*
- *Fixed the link to the HealthLink resources webpage that is shown on the final screen of the HealthLink Client installer.*
- *Fixed the Advanced Options tool so it is closed correctly during a CD upgrade on Mac OSX.*
- *Fixed the base server URL to have the correct value depending on the region where the HealthLink Client is installed.*
- *Fixed the HealthLink Client so it doesn't try to send a negative acknowledgement if it failed to send an invalid acknowledgement.*
- *Fixed the HealthLink Client so it correctly generates negative acknowledgements for invalid LAB2 messages.*
- *Fixed the HealthLink Client so it can write to shared directories on Mac OSX.*
- *Fixed the HealthLink Client so that an acknowledgement is generated when an SMD message doesn't match the incoming originating message.*
- *Modified the processing logic of the sender field in an HL7 message. Messages are no longer rejected.*
- *Modified the validation of MDM type messages. The payload invocation identifier is no longer required to be the same as the Healthlink message identifier.*
- *Fixed the Advanced Options tool and the System Tray so that they correctly display the HealthLink Client's mode of operation.*
- *Fixed the Advanced Options tool so that it displays an error when starting the HMS service if the HealthLink Client is already running.*
- *Prevented a set of files being incorrectly added to the /HLINK/ folder during installation.*
- *Fixed the HMS service so it can be started after performing a silent upgrade.*
- *Fixed the HealthLink Client so it cannot be started when the HMS service is already running.*
- *Fixed the HealthLink Client so it is restarted after a silent upgrade had been completed. The first user in the list of configured users is automatically logged in.*
- *Fixed the silent upgrade process so that it does not lock the installer file after the installation has finished.*

-
- *Fixed the Advanced Options tool so it correctly displays when the HMS service is running.*
 - *Fixed the silent upgrade process so that the HealthLink Client can be successfully updated when running as a service.*
 - *Updated the HealthLink Client installer so it will expire on 31st December 2015.*
